Chilton's Ford--Ford Taurus/Mercury Sable 1986-92 Repair Manual

Chilton's Auto Repair Manual, 1991

Top-selling car salesman Jake Jacobs helps readers conquer the common pitfalls of purchasing a vehicle with this complete and practical guide. Readers discover in-depth strategies for saving time and money, while avoiding hassles. All important topics are covered--from the secret profit a dealer makes when he sells a car called a hold back to government auctions. An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of Battle Hymn of the Tiger Mother). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive--even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting--with lessons that go down easy. You'll be laughing and learning at the same time.
